All New: Low Battery Alarm XLD12V, for +12 Volt Monitoring

Information on the Low Battery Alarm XLD12V

Micro processor controlled Low Battery Alarm for all battery systems. Prevent low or dead batteries by installing the Low Battery Alarm which has both LED, audible alarm and voltage display. This device will monitor your battery voltage and warn you of unsafe levels. The Low Battery Alarm set points are only adjusted by the manufacture and once set it cannot be changed by the user. Can be calibrated from +10.5 to +12.5 volts for alarm set point.

Ideal battery protection for RV's, autos, boats, generators or any device a battery may be critical to operation. Design to meet all the needs of all battery systems.

All orders must be placed directly to Battery Failsafe Devices
